

## Learning Assessment

Topic Relating Current Ohio Opiate Epidemic Trends to Child Welfare Practice

Participant \_\_\_\_\_

### Knowledge Area

Circle T(true) or F(false) in the left hand column for each question. After answers are reviewed (see page 2), tally the number of correct answers and place the total in the last box.

|        |  |
|--------|--|
| T or F | 1. The onset of tolerance to opioids grows rapidly, causing increased use over long periods of time.         |
| T or F | 2. Tolerance declines rapidly after discontinued use, resulting in high vulnerability to overdose and death. |
| T or F | 3. Primary withdrawal symptoms typically last about a month.   |
| T or F | 4. Extended withdrawal can last for months and is characterized by depressed dopamine levels.                |
| T or F | 5. Relapse rates can routinely exceed 90%.   |
| T or F | 6. Universal screening for substance use is a child welfare best practice that can improve outcomes.         |
| T or F | 7. Accurate SACWIS data is necessary to help document the need for treatment resources.                      |
| T or F | 8. Substance use information can be recorded in only three locations in SACWIS.                              |
|        | <b>Total Score</b>   |

### Skills and Attitudes

Rate yourself by putting a check in the appropriate box following the identified skill.

| Skills  | Needs Improvement | Meets | Exceeds |
|---|-------------------|-------|---------|
| I am able to:   |                   |       |         |
| Identify the key SACWIS data entry points related to substance use involvement                        |                   |       |         |
| See how my documentation can impact system resources  |                   |       |         |
| Identify opportunities to make practice changes in order improve outcomes for families                |                   |       |         |
| <b>Attitude</b>   |                   |       |         |
| I demonstrate:  |                   |       |         |
| Acceptance that good documentation will help tell the story of what resources are needed for families |                   |       |         |
| Commitment to submitting SACWIS data that describes substance involvement of families                 |                   |       |         |

**Comments and Commitments:** Add thoughts and comments including anything you gained from the lesson and how you plan to apply this learning in the coming week.

## Learning Assessment Key

1. **False** – Correct would be: increased use over short periods of time
2. True
3. **False** – Correct would be: primary withdrawal symptoms last about a week
4. True
5. True
6. True
7. True
8. **False** – Correct would be: 7 locations, including Intake Module, Substance Abuse Screening Tool, Safety Assessment, Family Assessment, Case Plan/Family Service Plan Concern, Substance Abuse Related Case Services, Person Profile – Characteristics.
